Answer all questions.

You are required to develop a grading system to MAHSA Kolej. As a good web developer, you have to follow all requirement as follows:

A. Login page and user validation before entering the grading system.

B. HTML Form to key in inputs such as student name, matric number, subject name, subject code, test 1(20%), test 2(30%) and final examination (50%).

C. Interface to display marks information such as student name, matric number, test 1, test 2, final examination, total marks and final grade.

D. You must perform a correct calculation based on the grading table shown in table 1 below.

E. Save all information into the database (PhpMyAdmin). The system should include buttons such as submit, search, view, edit and delete for data manipulation purposes.

Grading table as follows:

Marks	Grade
80-100	A
65-79	B
50-64	C
40-49	D
0-39	E

Table 1

F. Report Format:

i. Include introduction, problem statement and objective.

ii. Take a screenshots of the login page activity before and after the login button is clicked.

iii. Take a screenshot of the HTML form activity before and after the **Submit, search, view, edit** and **delete** button is clicked.

iv. Take a screenshot of the interface that displays grades and student information.

v. Take a screenshot of database structure and ERD in phpMyAdmin.

vi. Take a screenshot of all inputs entered in phpMyAdmin.
